## ADAPTATION OF SOCIAL WORK PROFESSIONS TO THE PREVENTION OF NATURAL RISKS AND CONSEQUENCES OF CLIMATE CHANGE

### NEWSLETTER N°2

#### WHERE DO WE STAND?

This newsletter of summer aims to discuss the following aspects:

1. Update on the activities undertaken;
2. The second meeting post-Covid 19

#### ACTIVITIES

The project was impacted like all Erasmus + projects by the pandemic but the consortium nevertheless has worked to allow the project to stay on course and on its roadmap. Online meetings allowed the collective of partners to continue the momentum.

On 1st of August, the IO1 production concerning the guide of local stakeholders of climate change and managed by ITG was completed and validated;

The platform (IO2 managed by ENAIIP) is structured and ready to accommodate content;

The main training modules concerning the impacts of climate change have been decided (IO3 managed by MCE & IFRTS) and the framework for developing the learning contents is now adopted;

The IO4 managed by UNESSA about social cohesion has made it possible to collect nearby 30 good practices, local and collective actions responding to challenges of climate change, in all partners' countries.

Thanks to the work of ENAIIP, you can now follow the project on its new website <https://www.socialandnature.eu/> available in 4 languages and on its Facebook page!

**NB: THE TRANSNATIONAL TRAINING EVENT, INITIALLY PLANNED AT THE START OF THE PROJECT, HAS BEEN POSTPONED DUE TO THE COVID 19 TO A DATE AT THE BEGINNING OF 2021 AT THE PREMISES OF IFRTS IN BASTIA.**

## MEETING POST COVID 19 IN ATHENS: AN OPPORTUNITY TO DISCOVER A GOOD PRACTICE!

*The team working at the project during the meeting in Athens*

This meeting, however difficult to organize, in particular for travel and its constraints, finally came to fruition.

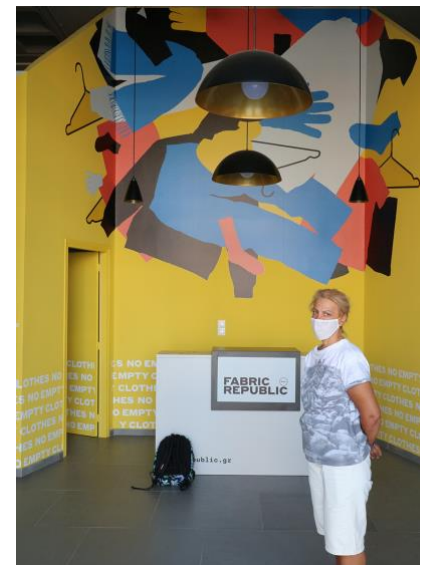

We thank the IASIS organization which was able to bring together, on 23rd and 24th of July 2020, all the partners in its premises by respecting all possible prevention measures.

We were able to plan and structure the rest of the project on productions and dissemination. A reconfigured calendar gives a new balance to the planned deadlines and the next meeting in Paris will take place in January 2021 and will be followed by the training seminar in early February in Bastia.

We benefit from the meeting to discover the beautiful project developed by IASIS: "Fabric Republic". The purpose of this project is to recover clothing and fabrics of all kinds and to meet the specific needs of associations and organizations that help people. The system put in place is intended to be integrated since it plans to reuse clothing that cannot be offered, for the manufacture of various items (bags, dresses, caps, etc.) for resale. Fabric Republic brings together associations, creators, Greek and European volunteers, as well as people with disabilities in a social and environmental project.

The partners of Social&Nature project were able to visit the reception and manufacturing place as well as the show room.

For more informations on this project [www.fabricrepublic.gr/](http://www.fabricrepublic.gr/)

*Welcoming in premises of the organization*
